

Egosecure - the #1 Encryption tool in the market

Encryption is the most effective way to achieve data security. **Encryption** is used to protect data in transit sent from all sorts of devices across all sorts of networks, not just the internet.

Encryption is important because it allows you to securely protect data that you don't want anyone else to have access to.

Egosecure provides the best encryption solution in the market. Egosecure can practically encrypt anything and everything.

Egosecure encryption modules include:

- Removable Device Encryption
- Full Disk Encryption
- Pre-Boot Authentication
- Local Folder Encryption
- Cloud Storage / Network Share Encryption

- Permanent Encryption (included in version 12)
- Android / iOS Encryption
- Mail Encryption

Different encryption methods can also be applied on the same data carrier device – this is truly flexible and convenient.

Do you know?

About 700 laptops are weekly reported stolen or lost at the airports.

65% of those people say that they take no steps to protect that confidential data.
